

301ci

Why follow trends when you can set them?

Ever-changing digital processes have been part and parcel of office work for years — it's impossible to think of life without them. Which means it's high time for an A4 colour multifunctional system that can keep up with these technical opportunities! Here's where the 301ci comes in. It's perfectly equipped when it comes to communication with mobile end devices, networks and practical apps, and despite its compactness, it offers a wide array of functions on a par with an A3 colour system. The 301ci transforms time-consuming and complex workflows into automated processes. In doing so, it is extremely efficient, quiet and, of course, environmentally friendly.

What you can expect:

Well-equipped: The 301ci features a large touch display for intuitive operation, supports conventional standards for mobile printing and scanning and offers the option of integrating numerous innovative HyPAS apps.* All this supports the simple, time-effective and highly automated completion of your recurring daily office tasks, and frees up even more time.

Well-thought-out: Even in its basic design, the 301ci wows with its 75-page original feeder for quickly scanning up to 40 image pages per minute and a 500-page universal cassette for A6R to A4 media with a paper weight of up to 200 g/m². However, you can get a lot more from and put a lot more into it— for example, a paper capacity of max. 3,100 sheets and different finishing options, from stapling to hole punching, as well as offsetting output or using the multi-tray.

Well-protected: Sensitive data is best handled by the 301ci, as if desired, it only outputs when the correct password has been entered or when it has been authenticated using a card reader*, chip card* or transponder.* Optionally, the Data Security Kit for hard disk data offers the perfect protection, as it deletes and overwrites data securely and sustainably so that it cannot be reconstructed.

Well-adapted: On top of offering high-tech features and a subtle, dark design, the 301ci is environmentally friendly. Its low noise level can be reduced even further in quiet mode, so that you can always fully concentrate on your work. In doing so, its energy consumption is amazingly low and it therefore meets the strictest requirements!
